

Disclaimer/Precaution

Solar Essence™ and the essential oils in it, support your body's systems and enhance function & mood.

Personnel at Solar Essence™ do not claim to be medical practitioners. We do not diagnose, treat or prescribe any medical treatment or advice. You should always discuss treatment of medical conditions with your medical practitioner before using any alternative therapies, natural supplements, or vitamins. The following safety precautions are guidelines only. You should consult with any aromatherapist about Solar Essence's essential oil usage and always inform your primary care physician what you are using as they may not be compatible with his/her prescribed therapy and medications. Doing your own research is also a good idea.

Keep Solar Essence™ away from heat, light, pets and children. Store at room temperature. As with any essential oil application, a skin patch test (dime size amount) is recommended before applying liberally. Discontinue use if you experience any unpleasant side effects or irritation of any kind. **Do not ingest this product** (not meant for oral consumption,) and avoid contact with eyes. **This product is for topical and aromatic use only.** If you are prone to allergies, use caution when applying to skin or inhaling it as with a room diffuser. (Do a 24 hour skin patch test if you are an especially sensitive person.) Pregnant or nursing women, children, or people who are taking prescription drugs or have a medical condition (people with liver or kidney disease or other health condition or who are undergoing major surgery) should consult with their physician or health care providers before using this product which contains essential oils. **Do not use this product if you have a tree nut allergy** (unsafe for nut allergic individuals). **Note:** Please see "Patch Test" instruction document located under the "MISC INFO" menu category heading on our site.

Just like any essential oil, keep Solar Essence™ in a secure place away from children and pets.

Bottles are filled by volume. Some bottle sizes may not be filled to the top, but do contain the volume of oil specified on your order.

A patch test is recommended on your skin if you suspect you might be sensitive. If you experience any soreness, redness or irritation do not use Solar Essence™. Stop using it immediately if a rash or other skin reaction occurs and gently wash it off. *Attn:* Please see red note above.

Always take precautions with using Aromatherapy. Do not use in a heat diffuser. Less is more, so start with the minimum amount and increase according to your state of well-being. **Diffusion Note:** Use 10 – 30 drops per 100 ml (about 3 ½ oz) in the EO diffuser of your choice. **Note:** We highly suggest using an ultrasonic (humidifying) diffuser to gain the maximum therapeutic benefits of Solar Essence™. We recommend the Asakuki 500ml Ultrasonic Aromatherapy Essential Oil Diffuser (lots of features, shuts off automatically when the water gets too low, safe and convenient to use).

If Solar Essence™ accidentally gets into your eye, a slight stinging will probably occur. Flush with clean warm water. If stinging continues flush the eye immediately with cold full fat milk or a mild carrier oil (coconut or olive oil) or put it on a soft cloth and wipe your eyes to remove it. Follow that up with washing your eyes with water. Seek medical attention if the stinging and/or irritation continues.
