Solar Essence’s compounds (plants and herbal extracts) have been carefully selected from nature’s creation that are alkaline based (not acid based substances which erode and destroy the cells) and are the highest in electrical vibration to power the body. It has 47 essential oils (EOs) derived from therapeutic-grade pure botanical organic plants and mineral ingredients consisting of herbs, flowers, leaves, roots, berries, stems, trees (bark, branches, twigs, needles), bushes, seeds, buds, resins, and fruits (peel/rind, etc.). It also contains 36 high quality plant-based carrier oils derived from 100% pure, natural, non-hybrid (heirloom), organic vegetable oils from various plant species (nut, kernel, seed or flower).

No other skincare product even comes close!

There is gross misconception in the health, supplement, nutrition and skin care industry. Most of the corporate skincare product ingredients are either extracted from hybrids which have fragmented molecular structures that are **unnatural** (unbalanced, non-natural negative energy) and lead to cellular destruction (not cell rejuvenation or cellular regeneration – balanced positive energy), genetically modified sources or they are chemicals therefore deeming them **unnatural** (a man-made, lab created, chemical cocktail which is artificial, synthetic chemical or drug based) and acidic to our body (unbalanced negative energy). Laboratory produced man-made vitamins and inorganic “oxide” minerals can’t help a human biologically or physiologically because they are not “electrical”. We are electrical, carbon-based beings (our hearts are electrical, our brains are electrical.) We run on electricity, **not synthetic lab produced chemicals**. *Man-made chemical skincare products are not skin cell food*. They are not bio-electric or compatible and in harmony with our “electric” bodies. They are “enemies” of the body. Skin cell food is fuel that feeds the skin/body cells electric energy from natural, organic, “phosphate” minerals and are alkaline based plant-derived substances which the body can chemically assimilate (biologically fully absorb). Solar Essence’s ingredients can be traced to the sun’s **SOLAR** rays and their natural encoded intrinsic **ESSENCE** (holistic healing) involving biophoton emission and energy transfer through the *Divinely* created process of *photosynthesis* (the transformation of the sun’s solar ray energy into a consumable fuel for the human physiology) and the phytoproducts they provide. Not the artificial, **unnatural** engineered process done in a lab to produce synthetic remedies for your skin.

We must learn to separate what is unnatural, synthetic, inorganic, hybrid and acidic from that which is natural (organic, alkaline, ELECTRICAL and not acid based). Alkaline herbs and plants were the original medicine and their energy as well as the plant’s nutrients resonate perfectly in our bodies. *Most of the energy we use today comes from the sun’s radiant energy which gets stored in the plant ingredients of Solar Essence’s super-energized formulation. Solar Essence™ is a byproduct of Nature’s Intelligence* (natural biophoton healing), nature’s Natural Defense (phytonutrient-rich) and a reflection of the powerful healing of Mother Nature which matches beautifully with our own bodies cells and what we need as natural beings... **it’s so powerful yet so gentle**. Holistic healing is there for us for the taking (restoring balance to body, mind, spirit & emotions/heart). *Nature’s pure essence, solar-power infused in a bottle!*

Divinity in a bottle... the way Nature made it... untainted Gifts from the Earth... and Sunshine fresh!

Your skin says a lot about you.... so wake up the spark of Divinity inside YOU!

Solar Essence™ has been meticulously formulated with natural, *organic carbon-based phosphate minerals (not inorganic “oxide” minerals)*, non-hybrid, alkaline, whole plant food which makes it electrical food for the skin at a cellular level as it relates to having the proper electromagnetic charge (electron donors or conductors of natural bio-electric healing) and energy that supports the body and the building blocks of life: Carbon, Hydrogen & Oxygen (the CHO chain). Inorganic oxide minerals (electron stealers or insulators of natural bio-electric healing) do not have complete molecular structures, the CHO chain and the body can't assimilate them (can't absorb, lacks chemical affinity). Humans are carbon-based creatures. A mineral that is electric and alive (not dead), is carbon-based and functions as an alkaline *inside* the body and has the C,H,O composition. *The building blocks of all life.*

AROMATHERAPY

Aromatherapy is the diffusion of pure, *natural aromatic essences from plants and botanical extracts* for the purpose of promoting harmony of the body, mind and spirit. It seeks to unify physiological, psychological and spiritual processes to enhance an individual's innate natural healing process. Combined with Solar Essence™ it promotes a calm nervous system, mood support, emotional well-being, skin health and more. *The use of scent to alter health and well-being for the better has been around for centuries.* Science has confirmed that scents have the ability to promote good physical, mental & spiritual health. **Aromatherapy is user-friendly, so there is no excuse to shy away from it (and, it's portable).** It's a gentle, natural technique that is a non-invasive way to take control of your health (nothing to take internally, no needles, no pain), yet all-encompassing in its ability to effect the well-being of the whole person through the use of one of our most powerful senses – the sense of smell. Of all five senses, it hits the brain first, faster than a speeding bullet (it's the “Superman of Senses”). Most aromatherapy oil based blends will be between 1 – 5% dilutions which typically does not represent a safety concern. Solar Essence™ has a dilution rate of 2% (-/+ .01%).

Solar Essence's blend of EOs and their bioactive compounds are comprised of 100% pure and natural extracts that, when properly diffused (or applied topically), can encourage wellness, tranquility and inspiration. Aromatherapy works through two different modes of action. The first is through the effect of aromas on the brain, which work through the olfactory system to affect emotions. The second is through the direct effects of the beneficial substances naturally inherent in the botanicals from which EOs are derived. Aromatherapy is not intended as a cure for any ailment. Rather, it helps the body to maintain its balance (equilibrium/homeostasis). It is part of holistic medicine that can bolster your immune system, promote a positive, clear outlook on life, relax the body, relieve stress and *get better sleep. Vibrant health throughout your mind, body and soul!*

Solar Essence's EOs penetrate the body in two ways: through the nose and the skin. The olfactory system, the nose-brain association, is the most direct connection we have with the environment. Think about how sensitive our sense of smell is – approximately 10,000 times more sensitive than any other sense organ we possess. The fact that our sense of smell is directly linked to stimulating the limbic brain and amygdala (where moods, feelings, emotions – anxiety, depression, anger, joy, sexual urges, stored learned responses, memory, creativity and certain regulatory functions are seated) makes one realize how this important route of absorption is neglected in everyday life. The EOs in Solar Essence™ are absorbed into your limbic system in less than 20 seconds. What affects the brain cells affects the body. Aromatherapy can strengthen your overall health, well-being and vitality. **Take advantage of the benefits of using Solar Essence™ in aromatherapy through a diffuser, directly inhale or apply with a Q-tip inside your nostrils before sleeping** (which is also when our body's do our most productive repair and healing). **Note:** *Nighttime is when our sense of smell is the most sensitive to any scent or odor molecules.*

There are 14 aroma families of EOs blended in Solar Essence™. Keep in mind that the advantages of essential oils are often increased when blended with other oils. The Solar Essence™ aroma families are: **Floral Fresh, Floral Sweet, Fruity Fresh (citrus), Fruity Sweet, Herbaceous (herbal/green, herbal/sweet), Camphoraceous, Medicinal, Spicy, Resinous/Musky, Licorice-like, Woody/Conifer, & Earthy.**
